Results Comment (Preliminary results)

No signs of slowing

- Preliminary 4Q results imply a consensus beat on rebounding memory profitability
- We raise our memory price outlook and forecast 2026 OP at W150tn
- Maintain Buy rating and raise target price to W180,000

4Q25 preliminary results review: Samsung is back

Samsung Electronics guided 4Q25 revenue and OP at W93.0tn and W20.0tn (OPM 22%) respectively, pointing to a consensus beat. We attribute the strong results to a sharp rebound in memory profitability driven by aggressive ASP hikes that timely capitalized on tight supply. By segment, we estimate OP as follows: memory W17.8tn (DRAM W15.7tn, NAND W2.1tn), non-memory -W1.2tn, Display W2.0tn, MX W1.5tn, CE/VD -W0.5tn, and Harman W0.4tn.

Memory in a boom phase

For full-year 2026, we raise our consolidated OP forecast from W118tn to W150tn, reflecting our upward revision to memory price outlook. Meanwhile, we trim DX OP forecast from W9.6tn to W7.5tn to reflect component cost inflation.

- Aggressive ASP hikes among suppliers should remain effective into 1Q26. Major server customers are planning an ambitious server build-up to meet a surge in token demand, supporting our expectation that they are prioritizing supply-chain stability over how fast ASPs rise (Server DRAM price expected to rise by 40–50% QoQ in 1Q26.)

- Same goes for setmakers. Amid limited inventories, they seem highly likely to take a Buy First approach in order to stay ahead of server customers' preemptive capacity securing.

If the aggressive price hikes were a well-timed strategic win, they are now being reinforced by a broader recovery in business competitiveness. Given that Samsung is starting to look like what the market had been anticipating for, we think the stock's strong rebound can continue through 1Q26. Reflecting our upgrades to earnings forecasts, we raise our TP to W180,000 and maintain Buy rating.

1) HBM: While HBM3e is poised to drive growth, supported by a strategic partnership with Broadcom, HBM4 is gaining clearer traction toward a successful market entry, underpinned by process advantages.

2) Logic/Foundry: New orders are likely from North American customers (including mobile and CSPs.) We still see scope for a meaningful recovery in utilization at even-number nodes (2/4/8nm.)

Tap 2. Samsung Foundry: Opportunities by tech node

Tech node	Details
2nm	1) Exynos 2600 (SF2 process): Set to be adopted in Galaxy S26 base/Plus (for Korea/Europe sell-in) and Samsung's new Flip model in 2026. Full-year 2026 volume should come it at 13-15mn units (Galaxy S26 series at 10mn units) 2) Tesla: AI semis (AI5/AI6) slated for mass production and should begin to translate into revenue from 2027 3) Qualcom: Appear to have secured new AP wins. Mass production slated to begin once customer adoption is confirmed 4) Other - MicroBT and Canaan (Mining ASIC) - Ambarella (ADAS chips) - Preferred Networks (AI chip) 5) Additional wins: likely in discussions for new orders from North American Fabless and CSPs
3nm	Exynos 2500 (3rd-gen 3nm GAA), Bitcoin-mining chips
4/5nm	Both captive (LSI) and external order intakes are likely to pick up and broaden. Volumes could expand as demand diversifies into networking chips. Going into 2026, margins should improve as the HBM4 base die mass production provides tailwind to profitability.
6/7/8nm	1) 6/7 nm: Believed to have secured orders for IBM's next-gen server CPU (Power 11) 2) 8 nm: Positioned to support Nintendo Switch 2 and Nvidia's automotive GPU. More new wins are expected, including major SoCs and North American customers
Legacy	New CIS wins expected from Greater China and North American mobile customers

[Compliance notice]

In accordance with Subparagraph 5 of Paragraph 1 of Article 4-20 of the supervisory regulations for the financial investment industry, we confirm that no information or content has been shared prior to its release on Daishin's website, and that the analyst has not received nor will receive direct or indirect compensation in exchange for expressing specific opinions. Daishin is not affiliated with the company presented in this report. This report has been presented without any undue external influence or interference, and accurately reflects the personal views of the analyst who is responsible for its content.

(Analyst: Ryu Hyung-keun)

This report is distributed for the purpose of helping investors make informed decisions. This report has been prepared from the data and information believed to be correct and reliable, but Daishin Securities does not make any guarantee as to the accuracy thereof. Investors reading this report should make final decisions based on their own judgment.

For U.S. persons only: For U.S. persons only: This independent third party research report is a product of Daishin Securities, which is the employer of the research analyst(s) who has prepared the research report. The research analyst(s) preparing the research report is/are resident outside the United States (U.S.) and are not associated persons of any U.S. regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a U.S. broker-dealer, and is/are not required to satisfy the regulatory licensing requirements of FINRA or required to otherwise comply with U.S. rules or regulations regarding, among other things, communications with a subject company, public appearances and trading securities held by a research analyst account.

This independent third-party research report is distributed in the United States ("US") to Major US Institutional Investors (as defined in Rule 15a-6 under the Securities and Exchange Act of 1934, as amended) by Maybank Kim Eng Securities USA Inc. ("Maybank KESUSA") and Auerbach Grayson and Company LLC, broker-dealers registered in the US (registered under Section 15 of the Securities Exchange Act of 1934, as amended). All responsibility for the distribution of this report by Maybank KESUSA in the US shall be borne by Maybank KESUSA. All responsibility for the distribution of this report by Auerbach Grayson and Company LLC shall be borne by Auerbach Grayson and Company LLC.

If the recipient of this report is not a Major Institutional Investor as specified above, then it should not act upon this report and return the same to the sender. Further, this report may not be copied, duplicated and/or transmitted onward to any U.S. person, which is not the Major Institutional Investor. In reliance on the exemption from registration provided by Rule 15a-6 of the Exchange Act and interpretations thereof by the SEC in order to conduct certain business with Major Institutional Investors, Daishin Securities has entered into an agreement with two U.S. registered broker-dealers, Maybank Kim Eng Securities USA Inc and Auerbach Grayson and Company LLC. All U.S. persons receiving and/or accessing this report and wishing to effect transactions in any security mentioned within must do so with: Maybank Kim Eng Securities USA Inc. 400 Park Avenue 11th Floor New York, New York 1- (212) 688-8886 or Auerbach Grayson and Company LLC 25 West 45th Street, New York, NY 10036 and not with the issuer of this report.

Analyst Certification of Independence

The views expressed in this research report accurately reflect the analyst's personal views about any and all of the subject securities or issuers; and no part of the research analyst's compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.
